2.1 Subsection title

as required. Don't forget to give each section and subsection a unique label (see Sect. 2).

Paragraph headings Use paragraph headings as needed.

$$a^2 + b^2 = c^2 \quad (1)$$

3 —Instructions—

- Headers are specified with #, ##, ###, etc. for H1, H2, H3, etc.
- When you would like to cite a paper, your citation looks like this: “(**Key?**)” - e.g. (**author2017?**)
- If you would like to add a figure, this can be done with an R snippet:
- To cross-reference figures in your text, simply write something like: As shown in Figure @ref(fig:figRef) ...
- Tables can be added using the kable function from knitr, for example:
- Cross-referencing a Table is similar to that of a Figure. For example: Table @ref(tab:tabRef) shows the data. . .
- Put #References at the end of your document to generate the bibliography.
- And don't forget to have a look here for more resources: <http://rmarkdown.rstudio.com/>
